François BEUGIN

Expert 4G/5G RAN Engineer

Expert RAN Engineer with 6 years' experience in 4G/5G network optimization, IoT integration, and Python-driven data analysis. Skilled in testing, validating, and deploying advanced 4G/5G features in live and lab environments to boost KPIs and network performance.

Work Experience

Jan 2024 – Present **Expert 4G/5G RAN Engineer**, *SFR*, Paris, France.
- Led RAN integration and validation of 5G SA, VoNR and Slicing in lab and live networks.
- Coordinated testing of 4G/5G new features and conducted KPI analysis in live environments.
- Delivered network optimization for NB-IoT & LTE-M, significantly improving performance KPIs.
- Managed large-scale drive-test data analysis, producing automated reports and dashboards.
- Developed internal tooling and Python SDKs to automate Huawei Network Element API interactions.
- Technical lead for troubleshooting and defect resolution, ensuring end-to-end RCA.
- Led RAN integration of 4G and 5G Energy Saving Features to reduce cost and carbon footprint.

Oct 2019 – Oct 2023 **Wireless Network Engineer**, *Huawei France*, Paris, France, *Graduate Program*.
- Managed system integration testing and validation of 4G/5G features across multi-vendor environments.
- Designed and implemented automated configuration tools, accelerating test preparation.
- Participated in the Site Design during the initial 5G Deployment.
- Collaborated with customers and internal teams on test protocol development for radio equipment.
- Coordinated defect handling and troubleshooting with customer engineering teams.

Mar – Sep 2019 **Radio System Engineer Intern**, *Bouygues Telecom*, Meudon, France, *Python Anaconda*.
- Analyzed mobile network data to optimize the 4G simulator and prepare 5G deployment.
- Classified radio sites based on daily traffic profiles using a K-means machine learning algorithm.
- Identified 5G information sources to develop models for the incoming 5G simulator.

Education

2016 – 2019 **MSc in General Engineering**, *IMT Atlantique(Former Télécom Bretagne)*, Brest-Rennes, France • GPA: 3.99/3.99.
- Specialty: **Networks and Telecommunications**
- IoT • Big Data • Cloud Computing • DevOps • Software Engineering • Signal Theory

Feb – Jun 2018 **Exchange Semester (Master level)**, *Seoul National University*, Seoul, South Korea.
- Data Mining • Advanced Digital Integrated Circuits • Microeconomics • Compiler Optimization

2014 – 2016 **Preparatory Classes (MPSI/PSI*)**, *Lycée Faidherbe*, Lille, France.
- Intensive undergraduate program in Mathematics, Physics and Engineering Science

Skills

RAN Expertise GSM • UMTS • 4G LTE • 5G NR (SA/NSA) • Slicing • VoLTE • VoNR

Trace Tools Genex Probe • Keysight Nemo • XCAL • QxDM • Wireshark

IoT NB-IoT • LTE-M • Arduino • Raspberry Pi • Pycom

Data & Dev Python (Anaconda, Pandas, Matplotlib) • Java • SQL • Bash • Git

Tools Tableau Software • LaTeX • Suite Office

Languages **French** : Native **English** : Fluent • TOEFL 623/680 **Korean** : Intermediate

Centres of Interest

Hobbies Bridge • Table Tennis • Coffee Tasting
